Full Stack Software Engineer & Team Lead with 7+ years of experience delivering production systems across industrial automation and enterprise web platforms. Specialized in .NET, Angular, distributed systems, and real-time data integration. Currently leading an engineering team supporting shipping operations at Steel Dynamics, driving AI-assisted development practices and platform modernization.

Skills

Programming: C#, .NET, TypeScript, Angular, NodeJS, JavaScript, Python, PHP, Swift, SQL, Entity Framework.

Cloud & DevOps: Azure DevOps, AWS, CI/CD, Docker, Kubernetes, GitHub Actions

Database Technologies: SQL Server, MySQL, NoSQL, Oracle, MongoDB

Software Development Concepts: Microservices, REST APIs, Agile Scrum, Unit Testing, Integration Testing, Design Patterns, SOLID Principles, AI-Assisted Development, LLM Integration, Risk & Guardrails for AI in SDLC

SCADA Systems & Industrial Automation: Wonderware, Siemens SICAM, PLC Programming, IEC 104, IEC 61850, Modbus

Experience

Lead Software Engineer | Steel Dynamics | Fort Wayne, IN Jan 2026 – Present

- Lead the engineering team supporting shipping operations, owning technical direction, delivery, and team execution.
- Mentor 5 developers, driving code-review, testing, and design standards for better code quality and delivery speed.
- Lead the team's adoption of AI-assisted development, partnering with management to define guardrails and risk-management practices that enable developers to ship better and faster.

Software Engineer | Steel Dynamics | Fort Wayne, IN June 2024 – Dec 2025

- Led architecture for the replacement of a legacy reporting system, designing 4 new microservices to generate hundreds of internal reports and customer-facing documents such as bills of lading and order acknowledgments.
- Built an in-house serverless C# script execution platform (an on-prem equivalent to AWS Lambda) to run the non-visual report logic previously hosted in the legacy system.
- Integrated Azure Entra ID to support authentication and role-based access across internal systems.
- Delivered new full-stack features with .NET APIs and Angular components to support sales workflows, and created internal NPM packages to standardize shared logic across teams.

Computer Lab Assistant (Developer & Tutor) | Ivy Tech Community College | Fort Wayne, IN Jan 2023 – Jan 2024

- Developed an iOS application for assignment tracking and student motivation, plus a writing planner that calculates an optimal schedule for students to complete writing projects on time.
- Led a redesign of the department's website and tutored students daily in software development and STEM fields.

Software Developer and System Integrator | Sirius | Turin, Italy Mar 2018 – May 2022

- Designed, delivered, and maintained SCADA applications for real-time monitoring and control of wind and solar installations, providing technical support throughout, using C#, Python, and JavaScript.
- Built and maintained field-to-datacenter pipelines (99.9% uptime) using IEC 104, OPC, and other protocols.
- Developed services to process operational data, automate reporting, and deployments across hundreds of sites.
- Applied machine-learning models to estimate wind turbine output during curtailment events, generating production data used to claim refunds from the national grid.

Full Stack Web Developer | Deliveriamo (formerly Pony Zero) | Turin, Italy Oct 2017 – Mar 2018

- Delivered the company's business-management web app end-to-end using PHP, Laravel, Eloquent, JavaScript, and MySQL to support internal operations.

Education

Western Governors University | B.S. Software Engineering May 2024

Ivy Tech Community College | A.A.S. Software Development (4.0 GPA) Dec 2023

Certifications

- CompTIA Project+
- AWS Certified Cloud Practitioner
